

Coding Manual of Curated Gen 3/NOS/Omni 2 dataset

Note:

1. This curated dataset contains information of Gen III, NOS, and Omni 2 participants.
2. There are 4608 unique FHS participants within this dataset*, with a total of 599 variables.
3. Variables are generally grouped based on their origins (i.e., primary FHS dataset)
4. The format of the curated dataset is of wide format, with distinct variable names that allow users to tell the difference for repeated measurements of data of similar nature.
5. For protocol descriptions and annotated forms of the primary datasets, refer to the respective documents of the individual source datasets.
6. Take note of the last verified date for outcome and mortality data:
 - a. Dementia – 12/31/2023
 - b. CVD/Stroke/AF – 12/31/2022
 - c. Cancer – 12/31/2019
 - d. Mortality/Last contact – 12/31/2021
7. Refer to [Appendix](#) for FHS core exam timeline (all cohorts)

* Depending on the source of the datasets, consent restrictions may affect the overall N.
